		Product No.: 97924245 MAGNA3 – More than a pump With its unrivalled efficiency, all-encompas	sing range and b	uilt-in communication capabilities plus				
		With its unrivalled efficiency, all-encompassing range and built-in communication capabilities plus functionalities replacing system components, the MAGNA3 is ideal for engineers and specifiers looking to create high-performance systems for buildings. This pump in the Grundfos Master Class will fit both heating and cooling applications perfectly, making						
	new.							
		The MAGNA3 is of the canned-rotor type, and with only two gaskets for sealing. The The innovative clamp with only one screw The MAGNA3 is a pump with no maintena	enables easy rep	ositioning of the pump head.				
		The pump is characterised by the following • controller integrated in the control box • control panel with TFT display on the cor • control box prepared for optional CIM models • built-in differential-pressure and temperal • cast-iron pump housing (depending on models • carbon-fibre-reinforced composite rotor constant • stainless-steel bearing plate and rotor class • aluminium alloy stator housing • air-cooled power electronics The MAGNA3 is a single-phase pump.	ntrol box odules ture sensor odel) an

		 Constant-curve duty. Max. or min. curve duty. Automatic Night Setback. No external motor protection required. Insulating shells supplied with single-heat Large temperature range where the liquid of each other. 		ing systems. I the ambient temperature are independent				
		Communication The MAGNA3 enables communication via • wireless Grundfos GO Remote • fieldbus communication via CIM modules • digital inputs • relay outputs • analog input (more than a pump function	3	neter)

		Motor and electronic controller						
		The MAGNA3 incorporates a 4-pole synchronous, permanent-magnet motor (PM motor). This type is characterised by higher efficiency than a conventional asynchronous squirrel-cage motor						
		The pump speed is controlled by an integrated frequency converter. A differential-pressure and temperature sensor is incorporated in the pump.						
		A unerential-pressure and temperature sensor is incorporated in the pump.
