	1	MAGNA3 D 40-120 F							
		Product No.: 97924465							
		MAGNA3 – More than a pump							
		With its unrivalled efficiency, all-encompassing range and built-in communication capabilities plus functionalities replacing system components, the MAGNA3 is ideal for engineers and specifiers looking to create high-performance systems for buildings. This pump in the Grundfos Master Class will fit both heating and cooling applications perfectly, making it the obvious choice for almost any building project – old or new.							
		The MAGNA3 is of the canned-rotor type, i.e. pump and motor form an integral unit without shaft seal and with only two gaskets for sealing. The bearings are lubricated by the pumped liquid.							
		The innovative clamp with only one screw enables easy repositioning of the pump head. The MAGNA3 is a pump with no maintenance requirements and with extremely low Life Cycle Cost.							
		The pump is characterised by the following • controller integrated in the control box	:						
		 control panel with TFT display on the cont control box prepared for optional CIM mod 	dules						
		 built-in differential-pressure and temperate cast-iron pump housing (depending on model) 							
		 carbon-fibre-reinforced composite rotor ca stainless-steel bearing plate and rotor classifier 							
		 aluminium alloy stator housing 	uung						
		• air-cooled power electronics The MAGNA3 is a single-phase pump.							
		Characteristic features AUTOADAPT. 							
		• FLOWADAPT and FLOWLIMIT (more that valves).	n a pump functio	n as it reduces the need for pump throttling					
		Proportional-pressure control.Constant-pressure control.							
		 Constant-temperature control. Constant-curve duty. 							
		Max. or min. curve duty.							
		Automatic Night Setback.No external motor protection required.							
		 Insulating shells supplied with single-head 	I pumps for heati	ng systems.					
		• Large temperature range where the liquid of each other.	temperature and	the ambient temperature are independent					
		Communication The MAGNA3 enables communication via t	he following:						
		 wireless Grundfos GO Remote fieldbus communication via CIM modules 							
		 digital inputs 							
		relay outputsanalog input (more than a pump function a	as heat energy m	neter)
