| | Description The pump housing has feet. The pump is to be secured to the delivered with steel support block clearance between the motor secure determines of the motor is a totally enclosed olerances comply with IEC 60. The motor efficiency is classified to the motor has thermistors (PT protection reacts to both slow-freemal switches must be concentrated and the secure determines. Further product details Furence Furen | The pump housing has feet. The pump is to be secured to the foundation with bilelivered with steel support blocks. The support blocks are support blocks. The motor flange are support blocks. The motor efficiency is classified as IE3 in accorda the motor has thermistors (PTC sensors) in the wiprotection reacts to both slow- and quick-rising term for the support blocks. The motors must be connected to an externation cause accidents. The motors must be connegulations.
